Training in HRSA-Designated Settings

Note: Percentage of training sites in HRSA-designated settings by program. Training settings are not mutually exclusive. MUC: Medically Underserved Community. Because NFLP does not sponsor training experiences, it does not utilize clinical sites for training purposes.

Advanced Nursing Education Programs

Advanced Education Nursing Traineeship (AENT)

- Approximately 74 percent of students receiving experiential training at clinical sites were students in family nurse practitioner programs.
- Students received training in primary care (72 percent), MUCs (56 percent), and/or rural settings (32 percent).
- The majority of students intended to seek employment or further education in primary care (70 percent), MUCs (63 percent), and/or rural settings (37 percent).

Advanced Nursing Education (ANE)

- The program developed or enhanced 327 courses and activities that trained 1,689 individuals.
- More than 76 percent of continuing education activities were accredited.
- The most common focus areas for training programs were family nursing (22 percent), gerontology (16 percent), and family psychiatry/mental health (12 percent).

Advanced Nursing Education Expansion (ANEE)

- Grantees partnered with more than 790 training sites to provide clinical experiences.
- Trainees intended to seek employment or further education in primary care (71 percent), MUCs (49 percent), and/or rural settings (34 percent).
- Across Academic Years 2011-2015, the program has produced 542 nurse practitioners.

Nurse Anesthetist Traineeships (NAT)

- More than 40 percent of trainees were male.
- Nearly 45 percent of trainees intended to seek employment or further education in MUCs.
- Training sites commonly served the chronically ill (88 percent), people with disabilities (86 percent), and individuals with HIV/AIDS (75 percent).

Nurse Faculty Loan Program (NFLP)

- NFLP student trainees were enrolled in a variety of degree programs all of which included a nurse educator component.
- Most students (91 percent) intended to teach following program completion.
- Nearly 19 percent of students reported being from a rural background.
