

# Advanced Nursing Education Programs

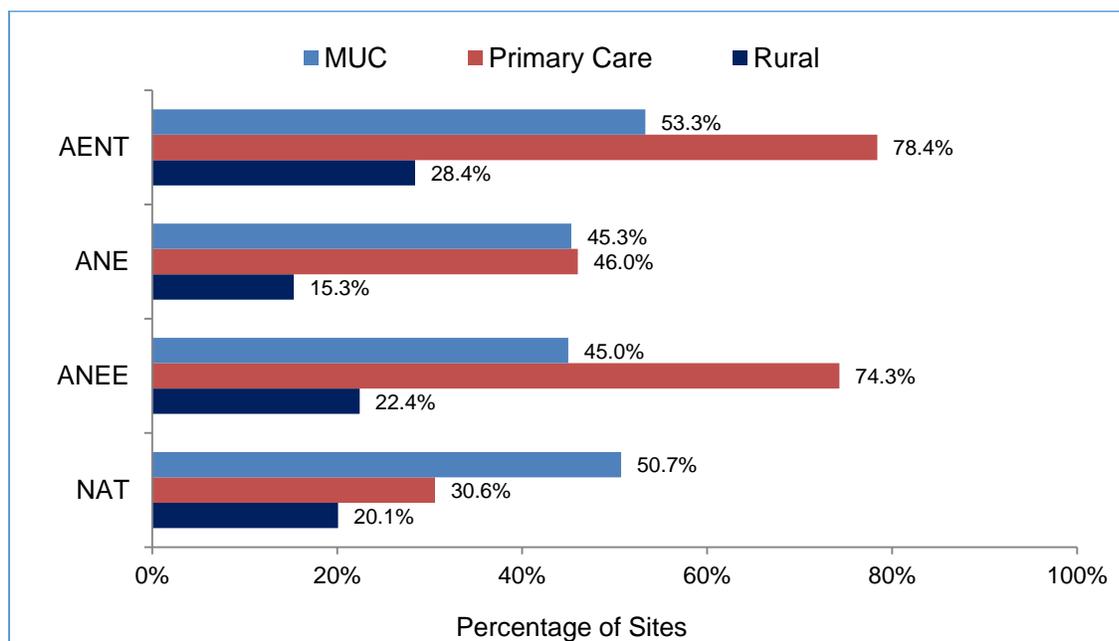

## Academic Year 2014-2015

The Advanced Nursing Education grants fund a number of activities, including several traineeships and an expansion program, with the aim of increasing the size of the advanced nursing workforce. Below is a descriptive summary of the characteristics and accomplishments of grantee programs and trainees who received Advanced Nursing Education support during Academic Year 2014-2015.

### Program Characteristics

Program Name	Grantees	Trainees	Trainee Characteristics				Graduates/ Program Completers
			Underrepresented Minority		Disadvantaged		
AENT	94	3,008	644	21.4%	1,095	36.4%	1,342
ANE	110	8,735	1,648	18.9%	1,666	19.1%	2,148
ANEE	25	289	60	20.8%	72	24.9%	168
NAT	82	3,229	459	14.2%	499	15.5%	1,552
NFLP	179	2,399	588	24.5%	485	20.2%	605

### Training in HRSA-Designated Settings

Note: Percentage of training sites in HRSA-designated settings by program. Training settings are not mutually exclusive. MUC: Medically Underserved Community. Because NFLP does not sponsor training experiences, it does not utilize clinical sites for training purposes.

Advanced Education Nursing Traineeship (AENT)

Advanced Nursing Education (ANE)

Advanced Nursing Education Expansion (ANEE)

Nurse Anesthetist Traineeships (NAT)

Nurse Faculty Loan Program (NFLP)

# Advanced Nursing Education Programs

## Advanced Education Nursing Traineeship (AENT)

- Approximately 74 percent of students receiving experiential training at clinical sites were students in family nurse practitioner programs.
- Students received training in primary care (72 percent), MUCs (56 percent), and/or rural settings (32 percent).
- The majority of students intended to seek employment or further education in primary care (70 percent), MUCs (63 percent), and/or rural settings (37 percent).

## Advanced Nursing Education (ANE)

- The program developed or enhanced 327 courses and activities that trained 1,689 individuals.
- More than 76 percent of continuing education activities were accredited.
- The most common focus areas for training programs were family nursing (22 percent), gerontology (16 percent), and family psychiatry/mental health (12 percent).

## Advanced Nursing Education Expansion (ANEE)

- Grantees partnered with more than 790 training sites to provide clinical experiences.
- Trainees intended to seek employment or further education in primary care (71 percent), MUCs (49 percent), and/or rural settings (34 percent).
- Across Academic Years 2011-2015, the program has produced 542 nurse practitioners.

## Nurse Anesthetist Traineeships (NAT)

- More than 40 percent of trainees were male.
- Nearly 45 percent of trainees intended to seek employment or further education in MUCs.
- Training sites commonly served the chronically ill (88 percent), people with disabilities (86 percent), and individuals with HIV/AIDS (75 percent).

## Nurse Faculty Loan Program (NFLP)

- NFLP student trainees were enrolled in a variety of degree programs all of which included a nurse educator component.
- Most students (91 percent) intended to teach following program completion.
- Nearly 19 percent of students reported being from a rural background.
