

Advanced Nursing Education Programs

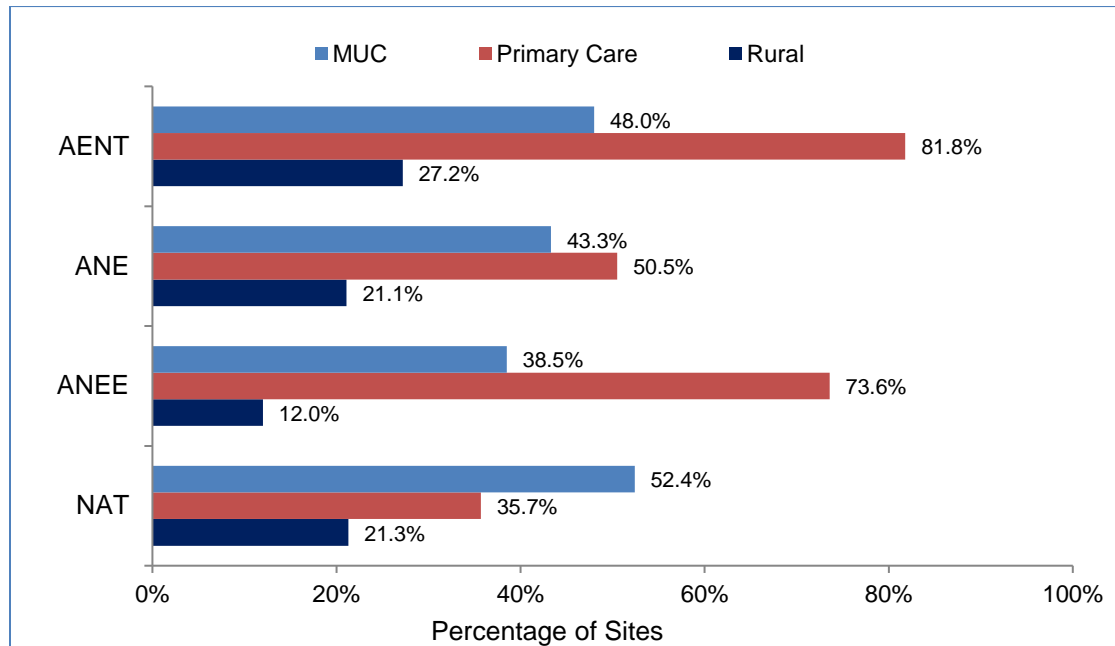

Academic Year 2015-2016

The Advanced Nursing Education grants fund a number of activities, including several traineeships and an expansion program, with the aim of increasing the size of the advanced nursing workforce. Below is a descriptive summary of the characteristics and accomplishments of grantee programs and trainees who received Advanced Nursing Education support during Academic Year 2015-2016.

Program Characteristics

Program Name	Grantees	Trainees	Trainee Characteristics				Graduates/ Program Completers
			Underrepresented Minority		Disadvantaged		
AENT	88	3,034	673	22.2%	1,142	37.6%	1,788
ANE	91	10,238	1,678	16.4%	1,710	16.7%	2,051
ANEE	16	131	30	22.9%	27	20.6%	88
NAT	79	2,491	367	14.7%	452	18.1%	1,327
NFLP	181	2,330	541	23.2%	487	20.9%	750

Clinical Training Settings

Note: A Medically Underserved Community (MUC) is a geographic location or population of individuals that is eligible for designation by a state and/or the federal government as a health professions shortage area, medically underserved area, and/or medically underserved population. Training settings are not mutually exclusive. NFLP does not utilize clinical sites for training purposes.

Advanced Education Nursing Traineeship (AENT)

Advanced Nursing Education (ANE)

Advanced Nursing Education Expansion (ANEE)

Nurse Anesthetist Traineeships (NAT)

Nurse Faculty Loan Program (NFLP)

Advanced Nursing Education Programs

Advanced Education Nursing Traineeship (AENT)

- More than 97 percent of students receiving experiential training at clinical sites were students in nurse practitioner programs.
- Students received training in primary care (80 percent), MUCs (59 percent), and/or rural settings (36 percent).
- The majority of students intended to seek employment or further education in primary care (74 percent), MUCs (56 percent), and/or rural settings (30 percent).

Advanced Nursing Education (ANE)

- The program developed or enhanced 572 courses and activities that trained 20,841 individuals.
- More than 86 percent of continuing education activities were accredited.
- The most common focus areas for training programs were family nursing (29 percent), adult gerontology (20 percent), and family psychiatry/mental health (13 percent).

Advanced Nursing Education Expansion (ANEE)

- Across Academic Years 2011-2016, the program has produced 630 nurse practitioners.
- Trainees intended to seek employment or further education in primary care (67 percent), MUCs (39 percent), and/or rural settings (11 percent) following program completion.
- Grantees partnered with 208 training sites to provide clinical experiences.

Nurse Anesthetist Traineeships (NAT)

- More than 39 percent of trainees were male.
- Nearly 63 percent of trainees intended to seek employment or further education in MUCs following program completion.
- Training sites commonly served older adults (92 percent), the chronically ill (88 percent), and adolescents (87 percent).

Nurse Faculty Loan Program (NFLP)

- NFLP student trainees were enrolled in a variety of degree programs all of which included a nurse educator component.
- Most students (92 percent) intended to teach following program completion.
- Nearly 20 percent of students reported being from a rural background.
