

# Advanced Nursing Education Programs

## Academic Year 2018-2019

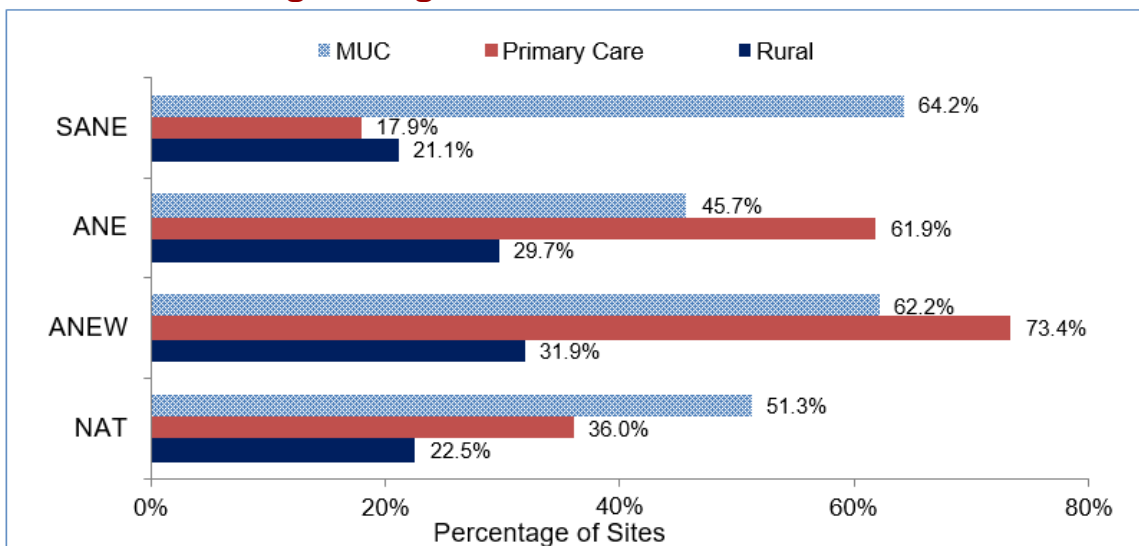

HRSA is the primary federal agency for improving health care to people who are geographically isolated or economically or medically vulnerable. HRSA programs help those in need of high quality primary health care by supporting the training of health professionals – focusing in particular on the geographical distribution of providers to areas where they are needed most.

The Advanced Nursing Education grants fund a number of activities, including several traineeships and a loan repayment program, with the aim of increasing the size of the advanced nursing workforce. Research suggests that training tomorrow’s nursing workforce in rural and other community-based settings is more likely to produce providers who will ultimately serve these high-need areas later in their career. Below is a descriptive summary of the characteristics and accomplishments of awardee programs and trainees who received Advanced Nursing Education support during Academic Year 2018-2019.

### Select Program Characteristics

Program Name	Awardees	Trainees	Trainee Characteristics Underrepresented Minority (URM)	Trainee Characteristics Disadvantaged	Graduates/ Program Completers
SANE	20	563	97 (17.2%)	139 (24.7%)	59
ANE	29	2324	484 (21.8%)	241 (10.4%)	642
ANEW	60	3658	773 (21.1%)	980 (26.8%)	1256
NAT	72	2647	430 (16.2%)	469 (17.7%)	1168
NFLP	257	2277	575 (25.3%)	486 (21.3%)	699

### Clinical Training Settings

Note: A Medically Underserved Community (MUC) is a geographic location or population of individuals that is eligible for designation by a state and/or the federal government as a health professions shortage area, medically underserved area, and/or medically underserved population. Training settings are not mutually exclusive. NFLP does not utilize clinical sites for training purposes.

Sexual Assault Nurse Examiners (SANE)

Advanced Nursing Education (ANE)

Advanced Nursing Education Workforce (ANEW)

Nurse Anesthetist Traineeships (NAT)

Nurse Faculty Loan Program (NFLP)

# Advanced Nursing Education Programs

## Sexual Assault Nurse Examiners (SANE)

- Nearly forty five percent of SANE trainees were registered nurses, focused on forensics.
- Students received training in primary care (6 percent), MUCs (39 percent), and/or rural settings (8 percent).
- Many graduates intended to seek employment or further education in a rural area (22 percent) and/or in a MUC (31 percent).

## Advanced Nursing Education (ANE)

- ANE awardees developed or enhanced 355 academic courses and activities that trained 6,243 individuals.
- More than 1,500 individuals participated in 39 ANE-supported continuing education courses.
- Over 59 percent of clinical training sites provided interprofessional education.

## Advanced Nursing Education Workforce (ANEW)

- Most ANEW direct-supported students received training in primary care settings (85 percent), MUCs (67 percent), and/or rural areas (48 percent).
- The majority of trainees received training in substance use treatment (51 percent) or specifically, opioid use treatment (49 percent).
- Graduates commonly intended to work or pursue additional training in a MUC (68 percent), in a primary care setting (58 percent), and/or in a rural area (45 percent).

## Nurse Anesthetist Traineeships (NAT)

- Nearly forty percent of nurse anesthetist trainees were male.
- Most trainees received clinical training in medically underserved communities (78 percent) and/or in primary care settings (39 percent).
- The majority of individuals received specific training in opioid use treatment (86 percent).

## Nurse Faculty Loan Program (NFLP)

- The majority of trainees (83 percent) were pursuing doctoral-level degrees; the most common discipline was nursing educator (53 percent).
- More than 21 percent of trainees reported being from a rural background.
- Graduates had taken an average of five education courses in the pursuit of becoming nursing faculty.
- Most graduates (95 percent) intended to teach following program completion.
